When a TV Play is paired with your hearing aids the icon will automatically display on the home screen of the app: See Image 1

When a TV is streaming to the hearing aids the TV Play icon will appear blue.

The volume slider above the TV Play icon adjusts the HEARING AID volume ONLY. This will directly affect sounds in the environment, NOT the volume of the TV through the hearing aids.

In order to adjust the volume of the TV streaming through the hearing aids, click on the TV Play icon and a separate volume slider will display: See Image 2
